

UNDERSTANDING VIDEO GAME ADDICTION

Are you a gamer who thinks that video games get a bad rap? Are you a parent worried that your kid is spending too many hours glued to their screens? Are you a teen who loves *Fortnite* and *Destiny* and just wants to figure out why people think this is all such a big deal? Our program is *perfect* for all of you!

Join Nadja Streiter, LMSW, a Clinical Social Worker and Therapist from The Center for Internet and Technology Addiction, for a superb digital presentation followed by an open Q&A session. We strongly encourage both **teens and parents** and **gamers of all ages** to attend this special and fascinating event.
